Aluminum Composite Panel (ACP) is a widely-used term, describing flat panels that consist of thermoplastic core bonded between two aluminum sheets. ACP are frequently used for external cladding of buildings (building facades). The main advantage of ACP is that, it is very rigid and strong, despite of its light weight. Due to the ability of painting the aluminum in any colour, ACP are produced in a wide range of metallic and non-metallic colours as well as patterns that imitate other materials, such as wood or marble. Applications of ACP are not limited to building's external cladding; they can be used in any cladding application, partitions, false ceilings etc. Aluminum composite panel are available in various thickness and various brands. ACP sheet are excellent in finish and are PVDF coated which is up to 35 micron. It can be bent, cut, drilled, punched and easily shaped into complex shapes. Easy installation and fabrication save cost and time periods of construction.

Advantages :

- Ultra modern look and excellent flatness.
- Light weight.
- Sound insulation and pollution resistant.
- Acid, alkali and salt spray resistant.
- Smooth paint finish and stability of flatness.
- Excellent UV characteristics.
- Resistant to blow and breakage.
- Minimizes vibration noise.
- Heat insulation
- Ease of installation and fabrication.
- Complex shapes possible.
- Easy maintenance.
- Superior flatness to other cladding products.
- Various colour choice.

Uses :

- Wall Cladding
- Room Partitions
- False ceilings
- Exterior
- Grill Board
- Banquet hall
- Elevation
- Wall Decor

ADVANTAGES, IMPROVE HOUSEHOLD LIFE

Temp Insulation

Save electricity

Anti-moisture

Protect Wall

Insulation & Intallation in 1 step

Different color and DIY

Easy Installation

Men and women, old young can do it

Sound-proof

Extra Thick, Nice sound-proof

Anticollision

Safe for baby
